DUTIES AND RESPONSIBILITIES

DUTIES and RESPONSIBILITIES:

Duties and responsibilities IAW CFETP 4B0X1

- Conduct preventative medicine studies in support of health-related base vulnerability assessments (VAs) (i.e. water and toxic industrial chemicals (TIC)/toxic industrial materials (TIM)). Coordinate with the base Anti-Terrorism/Force Protection (AT/FP) Office, Civil Engineering (CE), Security Forces (SFs), and other applicable Air Force Medical Service (AFMS) counterparts to locate and identify critical infrastructure and components and develop a mitigation plan. Use existing sources of intelligence to identify potential future threats. Assess overall vulnerabilities and provide recommendations to commanders to minimize health risk(s) to base personnel and mission.
- Identify and approve potable and non-potable water sources. Analyze local surface and ground water sources to determine the potability for both drinking and recreational purposes. Address health risks associated with non-potable water and communicate effective solutions to address potential health concerns.
- Execute OEH Site Assessments (OEHSAs). Collect site-specific data to characterize exposure pathways and levels to chemical, physical or radiological contaminants while in garrison and deployed. Identify OEH hazards and risks that may negatively impact health, human performance, and environmental health quality and communicate/advise the commander(s) and key site planning leadership of assessment results for use in site selection and site bed down planning in all operational environments. Document OEHSAs findings in the approved OEH management information system (OEH-MIS)
- Respond to accidents, natural disasters, and attack by hostile forces that may result in exposure(s) to OEH threats. Perform on-site HRAs within potential exposure zone(s), communicate health risk(s) to the commander, and document information regarding exposure(s) in the approved OEH-MIS.
- Participate in risk management/communication. Advise senior leadership and affected communities on health risks associated with operations and missions, the environment, and recreational activities. Effectively communicate on health effects, control measures, and outcomes.
- Identify health hazards to all personnel residing and/or working on the installation. Anticipate and recognize actual or potential chemical, biological, radiological, nuclear and physical health threats. Collaborate with CE and other base personnel to locate and identify hazards from occupational, environmental, and recreational sources. Analyze and evaluate actual or potential health threats using available equipment.

DUTIES and RESPONSIBILITIES (Cont'd):

SPECIALTY QUALIFICATIONS:
