#### DUTIES AND RESPONSIBILITIES

##### DUTIES and RESPONSIBILITIES:

Develops and implements civil engineer (CE) force employment, and provides staff supervision and technical advice. Performs and manages CE functions and activities to provide facilities and infrastructure supporting the United States and allies. Activities include programming, budgeting, project management, drafting, surveying, planning, feasibility studies, construction management, and disaster preparedness (DP) programs. Serves on response teams and related installation support services. Advises commanders and government officials on effective use of CE resources.

Supports combat operations and activities. Maintains trained and equipped forces capable of responding to worldwide contingencies and military operations other than war. Evaluates capabilities and develops contingency methodologies to accomplish mission objectives. Maintains emergency response force to cope with enemy attacks, major accidents, and natural disasters.

Provides leadership, support, training and supervision within a section or the unit comprising of several engineering officers and one or two senior NCO's in support of the units wartime mission: command staff augmentation to HQ MAJCOM, NAF, and Base Civil Engineer(s). Coordinates civil engineering forces and resources in support of customer requirements and coordinates activities with lateral and subordinate units and functions. Acts as technical representative and engineering consultant to others. Serves as advisor to section chief on all matters pertaining to personnel, training, equipment, policy, and readiness issues. Prepares OPR's and conducts feedback session as required. Serves as resource manager and as contingency engineer advisor to deployed engineering teams and HHQ when deployed in support of wartime mission. Ensures all members in section supervised are fully trained and competent at a high state of readiness for world-wide deployment.

Knowledge is mandatory of: contingency engineering, contingency base operations, explosive ordnance disposal (EOD), and survivability skills, including antiterrorism and force protection, force bed-down, expedient damage repair, and recovery after attack; methods, sources, and techniques of engineering design, construction, maintenance, operation, and repair of facilities and utility systems; resource acquisition and management; military facilities programming and planning; environmental stewardship; housing management; management of real property; fire prevention, protection, and aircraft crash rescue procedures; GEO Reach knowledge, engineering research and development; and formulation, coordination, and administration of plans and programs.

**DUTIES and RESPONSIBILITIES (Cont'd):**

**SPECIALTY QUALIFICATIONS:**

Graduation from a 4 year ABET accredited engineering school or NAAB architectural school. Completion of the AF Combat Engineering Course and Basic Engineering Course within 1 year of appointment. Prior experience in the military engineering career field is highly desirable. Employment in a related field and registration as an architect or professional engineer are desirable. An advanced degree in a technical or managerial field is desirable. Experience in joint or combined engineering staff operations is also desirable. Completion of, or enrollment in SOS is highly desirable and will be required for promotion to major. Eligibility for top secret security clearance.
